GATE SENTRY

Introducing

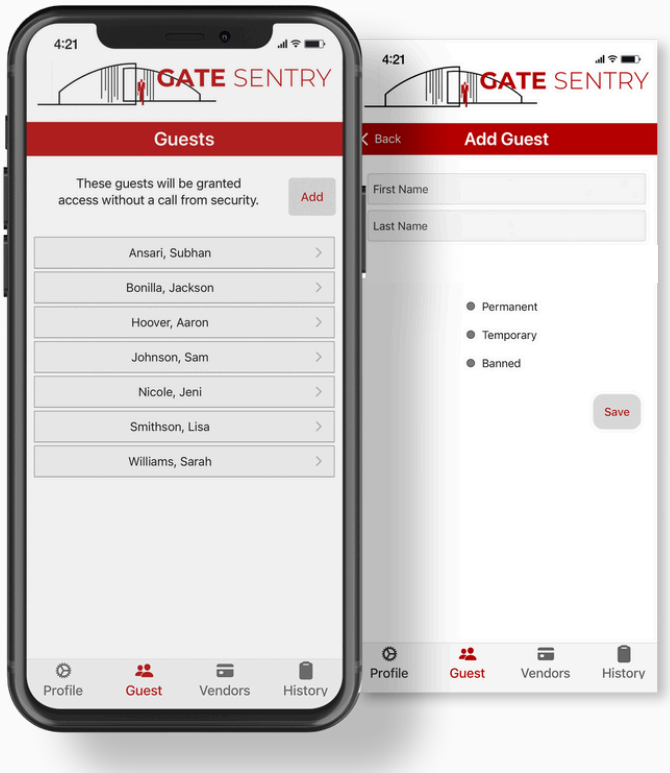

Gate Sentry

We're excited to announce the implementation of Gate Sentry as our new visitor access management system! Gate Sentry connects residents and security staff, streamlining visitor access and eliminating gate lines.

Account Creation: Soon, you will receive an email from support@gatesentry.com with information to set up your account!

Please create your account and add your visitors for a seamless transition!

Visitor Lists

By creating an account through the Gate Sentry web portal or the mobile app, you can add visitors, view visitor history, and receive arrival notifications.

Adding visitors to your list will streamline the entry process. Each time a visitor is granted access, you'll receive an arrival notification.
